

Project Type: Specialty Use
LEED Rating System: New Construction
Certification Level: Gold

The Horseshoe Casino Baltimore will be one of the first LEED Gold Casinos in the country. It is the first LEED Building for Caesars and will be a model to other casinos in its efficiency. The building collects and stores storm water for use in all lavatories and for all landscaping irrigation. A Combined Heat and Power system is helping the casino to achieve serious savings in their operational expenses as well. With the contractor, we were able to ensure a large quantity of materials incorporated into the project were from within 500 miles of the project and contained recycled content.

Major Sustainability Highlights

-  46% Water reduction
-  27% energy savings
-  94% of construction waste was diverted

Additional Sustainable Highlights:

Stormwater capture for water use in building
 Combined Heat and Power Generation

Project Team:

Owner:	CBAC Gaming
Owner:	Caesars
MEP:	JBA Engineering
Civil:	Colbert Matz Rosenfelt
Architect:	Ka Architects
General Contractor:	The Whiting-Turner Contracting Co
LEED Consultant:	Lorax Partnerships, LLC
